# Introduction

## **1.1 Document Overview**

This document contains information regarding the release of version 2.0.1 (2017) for *Digital Connect Check-In* (*DCCI*) REST services. Read this document so that you are aware of new features and enhancements that have been implemented in this release (as applicable).

These release notes are intended for both technical and non-technical audiences because both have an interest in the content of new releases of this product. Therefore, the information in this document is written to accommodate the requirements of both audiences whenever possible.

## **1.2 Release Identification**

Release Version	Type (Major, Minor, Maintenance, or Patch)	Date	Approved By	Description of Change
2.0.1	Maintenance	December 2017	Grzegorz Kurek, Joyce Schofield	New features, code corrections, enhancements

. . .

# **Release Features**

## 2.1 Feature

*Digital Connect Check-In* Release 2.0.1 REST Services includes the business feature of enhanced <u>REST</u> web services that describes modifications and updates made for this release.

The following business capabilities introduce updates to the API structure to better serve its new functions.

## 2.2 Mandate - Visa Check for UAE

A new directive requires the extension of the Advance Passenger Processing (APP) clearance/security process according to new rules imposed by the UAE – *United Arab Emirates*. Additional data related to a Visa document, such as a document subtype, are sent within the APP communication.

#### 2.2.1 Support Passport sub-type when adding/returning documents

For Timatic check purposes, it is possible to distinguish different passport types. Besides the regular passport documents, the service also recognizes:

- Diplomatic passport
- Special passport
- Mission/service passport.

Using Digital Connect Check-In REST services, the customer can add a specific type of passport.

New types of passports are the same as regular passports. They contain fields such as number, expiry date, etc.; therefore, the only difference is the new document *type*.

*Digital Connect Check-In* REST services can read new types of passports returned in the GetPassengerData operation response with the following descriptions:

- P Regular passport
- PD Diplomatic passport
- PS Special passport
- PM Mission/service passport

**Note** These changes are backward-compatible with *Digital Connect Check-In v2.0*.

#### 2.2.2 Return information about missing VISA

A passenger's security clearance can fail for several reasons, but one is a missing Visa document. The downline service sends this information in the GetPassengerData operation response. Missing VISA document information is available only when APP clearance has already been performed.

#### Features

- *Digital Connect Check-In* services returns eligibility about missing VISA documents (which is known from the Timatic project) when information is found in the GetPassengerData response (lookup operations).
- All changes are backward-compatible with Digital Connect Check-In v2.0.
- **Note** The current version of GetPassengerData can be used. There is no need to upgrade the service version.

# **Contacting Customer Care**

# 3.1 About Sabre Airline Solutions Customer Care

*Sabre Airline Solutions*<sup>®</sup> maintains the *Sabre*<sup>®</sup> *Global Customer Care* help desk that is available for all customers 24 hours a day, 7 days a week. *Customer Care* analysts facilitate the resolution of issues, questions, and requests for *Sabre Airline Solutions* products and services.

When you contact *Customer Care*, an analyst collects specific information about the issue, opens a service request in the tracking system, and then documents the issue to track handling and resolution. This logging and tracking process facilitates complete and accurate communication, which improves the resolution process, implementation process, and design of future enhancements to ultimately prevent recurrence of the issue.

*Customer Care* analysts manage all service requests throughout the service request's life cycle, from beginning to end. The analysts are committed to resolving all service requests in a professional and timely manner. They coordinate with subject matter experts to resolve issues and escalate as needed to ensure resolution. The analyst does not close a service request until it is fully resolved and communicated back to you.

# 3.1.1 Sabre Community Portal/eService Tool

Sabre Airline Solutions maintains the Sabre® Community Portal at community.sabre.com that offers:

- Access to the eService tool, from which you can submit and track service requests.
- Access to Sabre hosted applications.
- Training and documentation information.
- Application release notes and patches.
- User forums, news, and events.

#### 3.1.1.1 Registering for Community Portal Access

Access to the *Community Portal* is generally provided within 24 to 48 business hours. If your organization has a Delegated Administrator to approve the request, your access may be granted faster.

#### To register for Community Portal access

- 1. Go to community.sabre.com.
- 2. Click New Account.

The New User Registration page appears.

- 3. Enter required information.
- 4. Click Submit.

Once your request is approved, you will receive an email with additional information. Follow the instructions within this email to complete the registration process.

#### 3.1.1.2 Requesting Access to eService

Access to eService is generally provided within 24 hours.

**Note** You should only enter low or medium impact issues in the eService tool. If you have a high or critical impact level issue, you must call *Customer Care* for immediate attention. If you use eService to submit a critical impact level request, the service request will be excluded from time-to-resolution calculations.

#### To Request Access to eService

- 1. Login to community.sabre.com.
- 2. On the Home page, in the Support Services-eService tool area, click Request Access.

Customer eService Tool	
The eService module allows you to submit Service Requests through the Sabre Community Portal Request Access	If you don't have toll-free access, send us your phone number and we'll call you back.

#### 3.1.2 Telephone

**Note** To ensure the most expedient response, you must submit all critical and high impact issues directly by phone to *Customer Care*.

Countries with no-toll free service	+1 770 261 0080 (toll call).

You can also use the **Call Me** button when you need a *Customer Care* analyst to call you back. You can access the **Call Me** button from the following two locations on the *Community Portal*:

- On the **Home** page, in the **Support Services-eService tool** area.
- On the Contacts page, in the **Customer Care** area.

When calling in an issue, the *Customer Care* analyst will ask a number of basic questions to initiate a diagnosis of the issue. Questions may include:

- What is your name and telephone number?
- What is a valid email address?
- What is an alternate contact name and telephone number?
- What is your company name?
- What is the issue description?
- Which application and module were you using when the error occurred?

- What is the applications version number?
- What is the <u>impact on your company's operations</u>?
- Is the application completely disabled?
- Have you restarted the application?
- What error messages are you encountering, if any?
- What sequence of events (keystrokes/button clicks) led to the issue?
- Has the issue occurred before? If Yes, when?
- Does the issue occur on other workstations?
- Have you rebooted the workstation? (Cold/Warm)
- What logon ID were you using?

# 3.2 Customer Impact Levels

When you submit a service request, you specify the level of impact that the issue causes to your business. The following table defines the customer impact levels:

Impact Level	Conditions	
1 – Critical	System failure causes extreme business impact to operationally critical procedures.	
	<ul> <li>Key personnel are unable to perform operational tasks due to system outage.</li> </ul>	
	<ul> <li>Current business practices cannot be performed due to system failure and continued work stoppage has severe financial consequences.</li> </ul>	
	• Time critical functionality necessary to continue operations and resolution must be made as soon as possible.	
	<ul> <li>90 – 100% of users are impacted by system failure.</li> </ul>	
2 – High	System failure causes significant business impact.	
	• Workaround exists, but is impractical or labor intensive for extended outage duration.	
	The financial consequence is significant.	
	• 50 – 90% of users are impacted by system failure.	
3 – Medium	Impact to system is noticeable, but has little or no consequence to productivity.	
	Issue exists in a non-business critical function.	
	Workaround exists or is not necessary.	
	Less than 50% of users are impacted.	
4 – Low	Functional impact is negligible or non-existent.	
	Functionality (or system change) not necessary for business to continue.	

# 3.2.1 Severity Levels

After you submit a service request, a *Customer Care* analyst reviews it and sets the severity level according to the following guidelines:

Severity Level	Description
1	A complete loss of service. The system is inoperable. Work cannot continue.
2	A severe loss of service. Issue affects a critical business function. However, work can continue in a restricted operating mode.
3	A moderate loss of service. A workaround is available.
4	No loss of service. Issue is minor. No workaround is required.

# 3.2.2 Product Availability Levels

All products are classified into the following product availability levels:

Availability Level	Application Type	Description
High	Real time and operational (such as, crew tracking/assignment applications).	Any outage or issue that has a major impact on a customer's ability to conduct day-to-day business operations.
Normal	Business management/planning (such as, planning and scheduling and yield management applications).	Any outage or issue that can potentially affect a customer's ability to conduct day- to-day business operations.
